Moulded pulp
packaging
to improve fruit
sector efficiency

With over 60 years of experience in the development, manufacture and sale of moulded pulp products, we have pioneered the introduction and use of this material in the fruit industry.

Our proprietary technology allows us to continuously innovate in the manufacture of our products. Our deep knowledge of the market and extensive experience in the industry, coupled with our firm commitment to teamwork, have positioned us as a benchmark and leader.

We currently work with clients throughout the world from our facilities in the province of Barcelona, Spain.

We are present in over 30 countries

42,000 m²
of industrial floor
area

Over 200
million pieces
produced each
year

1800
moulds
available

We control the entire production process

We design, create and produce in-house and have the necessary infrastructure to manufacture, store and distribute our products flexibly and efficiently.

R&D

Raw materials

We select the recycled paper used to ensure optimum quality for each product type.

Manufacturing

The capacity and diversity of our machinery and equipment allow us to adapt to all our clients' needs and market demands, ensuring the highest levels of productivity, efficiency and quality.

Logistics

Our facilities allow us to optimise our logistics management, receiving and dispatching our clients' orders via a fast, streamlined process.

R&D

Our R&D Department is involved in every stage of the process, meeting market demands and providing competitive advantages to our clients.

100% Organic

Our moulded pulp is 100% organic. Made from recycled paper, it is recyclable and biodegradable and reflects our deep commitment to sustainability and the environment.

Every year, we use around 12,000 tonnes of recycled paper, an amount equivalent to preserving 257 hectares of land planted with 144,000 trees.

Product features

Protects foods

Cushions and absorbs impacts during transport.

Reduces times and costs

The semi-rigid nature of pulp makes it possible to optimise production by automating processes, during both packaging and handling.

Flexible

We can adapt our product distribution to the different features and needs of each fruit season.

We also offer trays in various sizes to fit different sizes of crates with a range of cells to accommodate each fruit type, diameter and size in order to meet all our clients' needs.

Controls moisture

Absorbs moisture whilst keeping fruit fresh and preserving its properties.

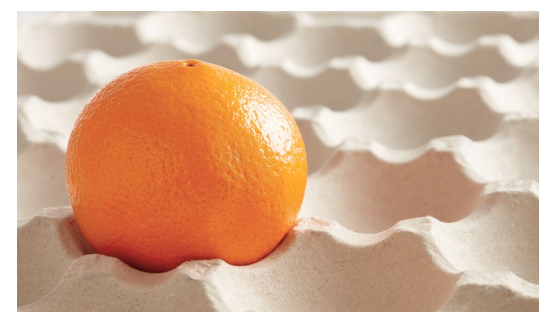

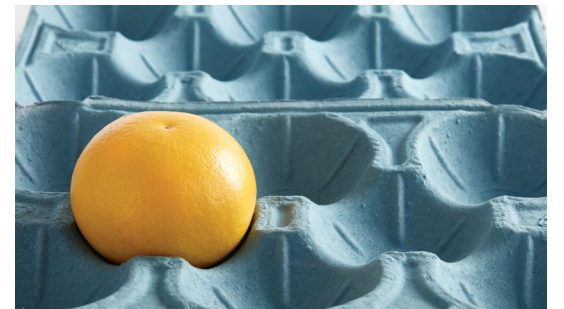

We make all your ideas for moulded pulp products for the fruit industry a reality

You can find the full information and technical specifications of each of our 150 plus products on our website.

We also have a showroom where you can physically see and handle our entire range of products and moulds.

We enhance the customer experience at the point of sale

Moulded pulp provides a solution for consumers' concerns and wishes to acquire sustainable products. Its ergonomics, quality and pleasantness to the touch make it a perfect material for the point of sale.

Its texture allows the trays to be stacked at different angles, keeping food from slipping in displays.

We also manufacture for other industries

Poultry

Egg trays, industrial or shrink-wrapped, available in different colours and formats.

Wine

Trays to protect and transport bottles of wine (Bordeaux and Burgundy formats) and cava.

Other

Packaging to protect technological and medical products and equipment requiring extra safety precautions.
